

Tank Container

For transporting lightly radioactive liquids (LSA II, ADR class 7), three tank containers are available, each with a capacity of 9m³. These tank containers are also used to dispose of materials from the personnel decontamination container.

The tanks themselves are contained within a frame construction with the same standard DIN dimensions as a regular 20' container. They are electrically heated and are insulated. Filling and emptying is performed with an Argus coupling and hoses.

Technical Data:

Material	Stainless steel 1.4571
Height	2.438 mm
Width	2.438 mm
Length	6.058 mm
Weight	15 to
Volume	9.000 l
Heat output	9,46 kW
Power supply	400V/32 A
Isolation	50 mm PU
Connection	Argus NW50
