

Logistics Trailer

A semi-trailer with pneumatic suspension is available for storage of operational clothing, supplying personnel, and other operational needs. The logistics trailer is divided into an

- Office room
- Kitchen
- Storage room with 130 lockers for operational clothing and equipment
- Self-erecting tent annexe formed from the hydraulic side wall of the trailer and integrated roll-down elements

The entire unit is air-conditioned, and can be supplied with electricity from a sound and vibration-proof on-board generator, independent of any external power supply.

The vehicle is fitted with a 10 metre long electro-hydraulic side wall which can serve as a roof for the annexe tent, which is normally stored in the equipment room. The annexe tent can be easily and quickly anchored to the side wall using a lifting device.

Technical Data

Type	Semi trailer
Dimensions	
Height	4.000 mm
Width	2.500 mm
Length	13.350 mm
Max. weight	32 to
Generator	18 KVA
2 Diesel-Heater	9 kW
Power supply	400 V/ 32 A
USV	5 kVA
Side wall	25 m² electro-hydraulic
